SKILLS

LANGUAGES

Python · SQL · Excel

LIBRARIES

Pandas · NumPy · Matplotlib · Seaborn · Scikit-learn

VISUALIZATION

Power BI

TOOLS

Git · Jupyter · VS Code

ANALYTICAL

EDA · Data Cleaning · Statistical Analysis · Dashboard Design

CERTIFICATIONS

- Excel for Data Analysis
- Power BI Analytics
- Python & SQL for Data Science
- Core Python

LANGUAGES

Hindi — Native

English — Professional

PROFILE

Data Analyst skilled in building automated data pipelines and interactive dashboards using Python, SQL, and Power BI. Experienced in working with API-driven datasets to analyze job market trends, sales performance, and energy consumption patterns.

API-Based Data Projects · Power BI Dashboards · 1,100+ Job Listings Analyzed

EXPERIENCE

Data Analytics Project Work

Dec 2023 - Dec 2024

ShapeMySkills

→ Performed data cleaning and exploratory data analysis on real-world and API-based datasets

→ Developed interactive dashboards using Power BI for business insights and KPI tracking

→ Applied statistical techniques and machine learning models (Scikit-learn) to identify patterns in real-world datasets

→ Worked on end-to-end data workflows including data extraction, transformation, and visualization

PROJECTS

01 Job Market Pulse Analytics Pipeline

- Collected and analyzed 1,100+ job listings using API-based data extraction
- Identified top 3 cities contributing ~66% of total job demand and key in-demand skills
- Built interactive Power BI dashboard to track hiring trends, skill demand, and geographic distribution
- Performed data cleaning and transformation using Python (Pandas, NumPy)
- Enabled identification of hiring trends and in-demand skills to support data-driven career decisions.

Python · Power BI · EDA · Data Cleaning · NumPy · Pandas · API

02 Sales Performance Analytics Dashboard

- Integrated API-driven sales data and analyzed multi-period performance trends
- Designed KPI dashboard to identify revenue concentration risks and business performance patterns
- Used SQL for querying and transformation, and Power BI for visualization and reporting
- Provided insights into revenue concentration risks for improved business decision-making.

SQL · Power BI · KPIs · API

03 Household Energy Consumption Analysis

- Analyzed 3 years of time-series energy consumption data to identify seasonal usage patterns
- Detected peak demand periods and usage trends using statistical analysis
- Visualized insights using Python (Pandas, Seaborn, Matplotlib)
- Helped identify peak usage patterns for better energy consumption planning.

Python · Pandas · Seaborn · Matplotlib · Statistical Analysis
