SKILLS

LANGUAGES

Python SQL Excel

LIBRARIES

Pandas NumPy Matplotlib
Seaborn Scikit-learn

VISUALIZATION

Power BI

TOOLS

Git Jupyter VS Code
MySQL

ANALYTICAL

EDA Data Cleaning
Statistical Analysis
Dashboard Design

CERTIFICATIONS

SQL (Intermediate) — HackerRank
Python (Basic) — HackerRank
Python, SQL & Power BI for Data Analysis

LANGUAGES

Hindi Native
English Professional

PROFILE

Data Analyst skilled in building automated data pipelines and interactive dashboards using Python, SQL, and Power BI. Experienced in working with API-driven datasets to analyze job market trends, sales performance, and energy consumption patterns.

API-Based Data Projects

Power BI Dashboards

1,100+ Job Listings Analyzed

EXPERIENCE

Data Analytics Intern

Dec 2023 - Dec 2024

ShapeMySkills

- Performed data cleaning and exploratory data analysis on real-world and API-based datasets
- Developed interactive dashboards using Power BI for business insights and KPI tracking
- Applied statistical techniques and machine learning models (Scikit-learn) to identify patterns in real-world datasets
- Worked on end-to-end data workflows including data extraction, transformation, and visualization

PROJECTS

Live AQI Monitoring & Pollutant Analytics System

01

- Built a real-time AQI monitoring and analytics system using Python, MySQL, and Power BI
- Developed automated ETL pipelines to collect live pollutant data from REST APIs
- Created multi-page Power BI dashboards featuring AQI trends, pollutant heatmaps, and severity analysis
- Automated data collection using batch scripts and Windows Task Scheduler

Python · MySQL · Power BI · Pandas · REST APIs · SQL · ETL Automation

Job Market Pulse Analytics Pipeline

02

- Collected and analyzed 1,100+ job listings using API-based data extraction
- Identified top 3 cities contributing ~66% of total job demand and key in-demand skills
- Built interactive Power BI dashboard to track hiring trends, skill demand, and geographic distribution
- Performed data cleaning and transformation using Python (Pandas, NumPy)
- Enabled identification of hiring trends and in-demand skills to support data-driven career decisions.

Python · Power BI · EDA · Data Cleaning · NumPy · Pandas · API

Sales Performance Analytics Dashboard

03

- Integrated API-driven sales data and analyzed multi-period performance trends
- Designed KPI dashboard to identify revenue concentration risks and business performance patterns
- Used SQL for querying and transformation, and Power BI for visualization and reporting
- Provided insights into revenue concentration risks for improved business decision-making.
