EDA Data Cleaning
Statistical Analysis
Dashboard Design

CERTIFICATIONS

SQL (Intermediate) — HackerRank
Python (Basic) — HackerRank
Python, SQL & Power BI for Data Analysis

LANGUAGES

Hindi Native
English Professional

PROFILE

Aspiring Data Analyst with hands-on experience building automated ETL pipelines, API-driven analytics systems, and interactive Power BI dashboards using Python, SQL, and MySQL. Comfortable working with real-world datasets, automating workflows, and turning raw data into meaningful insights through visualisation and analysis.

API-Based Data Projects

Power BI Dashboards

1,100+ Job Listings Analyzed

EXPERIENCE

Data Analytics Intern

Dec 2023 - Dec 2024

ShapeMySkills

- Worked with real-world and API-based datasets for data cleaning and exploratory analysis
- Built interactive Power BI dashboards for business insights and KPI tracking
- Applied statistical analysis and Scikit-learn techniques to identify patterns in real-world datasets
- Worked on end-to-end data workflows including data extraction, transformation, and visualisation

PROJECTS

Live AQI Monitoring & Pollutant Analytics System

01

- Built a real-time AQI monitoring and analytics system using Python, MySQL, and Power BI
- Developed automated ETL pipelines to collect live pollutant data from REST APIs
- Created multi-page Power BI dashboards featuring AQI trends, pollutant heat maps, and severity analysis
- Automated data collection using batch scripts and Windows Task Scheduler

Python · MySQL · Power BI · Pandas · REST APIs · SQL · ETL Automation

Job Market Pulse Analytics Pipeline

02

- Collected and analysed 1,100+ job listings using API-based data extraction
- Identified top 3 cities contributing ~66% of total job demand and key in-demand skills
- Built interactive Power BI dashboard to track hiring trends, skill demand, and geographic distribution
- Performed data cleaning and transformation using Python (Pandas, NumPy)
- Enabled identification of hiring trends and in-demand skills to support data-driven career decisions.

Python · Power BI · EDA · Data Cleaning · NumPy · Pandas · API

Sales Performance Analytics Dashboard

03

- Integrated API-driven sales data and analysed multi-period performance trends
- Designed KPI dashboard to identify revenue concentration risks and business performance patterns
- Used SQL for querying and transformation, and Power BI for visualisation and reporting
- Provided insights to support better business decision-making.
